**During a celebration of Earth Day, Topaz International Announces they are now a
100% Virtual company and a Carbon Neutral Business**

Portland, Oregon – April 24, 2007 – Today the world’s leader of corporate travel auditing services announced they are now a 100% virtual company worldwide, and is offsetting all business travel made by Topaz employees with contributions to carbonfund.org. “Topaz International is taking a leading role in the corporate travel industry regarding environmental impacts of our industry,” noted Bradley J. Seitz, President and CEO. “This is a small step for a small company, but I have to believe that every little bit helps.”

“By eliminating all commuting emissions from the Topaz International team, and then offsetting emissions from business travel, package deliveries and other known impacts with planting of forests, we hope to leave this earth better than when we arrived.” Added Mr. Seitz, “This idea came to me during the Association of Corporate Travel Executive Conference in Barcelona last fall. As we continue to learn about our impact on the globe, we will revise and enhance our policies to ensure we are doing the best we can at all time in the future.”

About TOPAZ International

Topaz International provides strategic support to the corporate travel management professional. With over 25 years of experience analyzing travel related expenditures, Topaz is a world leader in airfare & hotel auditing, providing benchmark information and consultancy services to improve the delivery of corporate travel services. Supporting travel managers, buyers and agencies, Topaz helps improve performance and facilitate cost savings.
